

HIGH QUALITY SHRIMP FEEDS

— In collaboration with —

Made for Indian Aquaculture Conditions
With
Globally Proven Technology and Formulation Research

STARTERS

PROVA starters are formulated to give a good start for shrimp at the start of their life cycle. Shrimp that have good immunity and other vitals at young age will have better disease resistance and growth in later stages as they grow. For the same reason we formulated PROVA starters with very fine ingredients that are highly palatable and promote growth, and also PROVA starters are fortified with Non-Specific immunity enhancers, Probiotics, High concentration of Vitamins and Minerals, Digestive enzymes to give good immunity and growth to shrimp at the start of culture.

GROWERS

LOW/MEDIUM DENSITY FARM

NUMEI Growers are our solution to Indian farming conditions where general stocking densities are in low or medium range. Our formulation considered available nutrients and pond parameters in low/medium density farms in India. NUMEI is high quality feed which gives same growth as premium feeds in low/medium densities farms, but very cost effective. NUMEI is fortified with high concentration of Vitamins, Minerals and Immunity Enhancers.

HIGH DENSITY FARM

PROVA Growers are specifically formulated for intense farming conditions and manufactured with finest imported and domestic ingredients. High concentration of easily digestible Nutrients, Vitamins and Minerals are added to satisfy nutritional requirements where high number of shrimps are competing for available resources. Special Stress Relievers and Immunity Enhancers are added to give growth and protection in high intensity environment.

FEEDING CHART

DOC (Days of Culture)	Feed Name	Feed No	Weight of Shrimp (Grams)	Feeding Ratio (% of Biomass)	Feed in Check Tray (gm/Kg)	Checking Time	Feeding Frequency / Day
1-7	PROVA	1	0.02-0.4	60-35	1	3hrs	2-3
8-14	PROVA	2	1	10	2	3hrs	2-3
15-21	PROVA	2	1.5	7	3	3hrs	2-3
22-28	PROVA	3	2.3	6	4	3hrs	3-4
29-35	PROVA	3	3.5	5	5	3hrs	3-4
36-42	PROVA / NUMEI	3P	4.8	4.6	5	2.30hrs	4-5
43-49	PROVA / NUMEI	3P	6	4.2	5	2.30hrs	4-5
50-56	PROVA / NUMEI	3P	7.5	3.6	5	2.30hrs	4-5
57-63	PROVA / NUMEI	3P	9.3	3.4	6	2hrs	4-5
64-70	PROVA / NUMEI	3P+3M	11.5	3.2	7	2hrs	4-5
71-77	PROVA / NUMEI	3M	13	2.9	8	2hrs	4-5
78-84	PROVA / NUMEI	3M	14.8	2.6	8	2hrs	4-5
85-91	PROVA / NUMEI	3M	17	2.4	9	2hrs	4-5
92-98	PROVA / NUMEI	3M	19	2.3	9	1.45hrs	4-5
99-105	PROVA / NUMEI	3M+3L	21	2.1	10	1.45hrs	4-5
106-112	PROVA / NUMEI	3L	23	1.9	10	1.30hrs	4-5
113-120	PROVA / NUMEI	3L	26	1.8	10	1.30hrs	4-5
120+	PROVA / NUMEI	3L	>28	1.7	12	1.30hrs	4-5

Feeding table should be used as a guideline. Actual feed should be adjusted based on your stocking density, biomass estimate and check tray observation.

PROVA Starters are formulated for use in all ponds. PROVA Growers are formulated for high density ponds and ponds with unfavorable conditions. NUMEI Growers are formulated for low/medium density ponds.

PRO5000 WS

PRO5000 WS is a Water and Soil probiotic Made in USA by BIOFERA LLC. Good pond management is as important as Good feed in Shrimp farming, PRO5000 WS helps in managing pond parameters. Its unique tablet form allows it to reach pond bottom and start degrading sludge and waste. It reduces Ammonia, H₂S and Nitrates. Eliminates Vibrio and Algae by competitive exclusion.

PRO5000 WS helps in reducing diseases, faster growth and improved FCR

Our new ISO 9001:2015 certified manufacturing plant

**Plant computer automation system
from Fuji Electric, Japan**

**Best available Shrimp pelleting
system with German technology**

**Inhouse laboratory for Quality
Checking of Raw materials and Feed**

PRO5000 WS is Made in USA by BIOFERA LLC

PROVA and NUMEI are Made in India by Coastal Feeds in Collaboration with BIOFERA LLC
